

ALEXANDRE MADEIRA

SOFTWARE DEVELOPER

Lisbon, Portugal

Software developer with a strong back-end focus and experience across full-stack, cloud, and AI development, with a track record of owning projects end-to-end from architecture to delivery, collaborating across teams and codebases to deliver results. Passionate about building well-structured, maintainable systems and finding solutions to difficult problems.

WORK EXPERIENCE

Full-Stack Developer

Aptoide

11/2023 - Present

Contributions and Achievements

- Contributed with new features and improvements to the back-end and front-end of the Aptoide Connect product across close to 10 different projects, frequently implementing flows that span multiple codebases, using TypeScript with Express.js and Angular.js
- Built and maintained an AI Customer Support Chatbot using Python and integrated it into the Aptoide Connect platforms, establishing the new "first line of defense" for customer support, achieving a success rate of 90% and reducing incoming human support inbox messages by 65%
- Led development of an experimental automated QA platform with specialised workers for app ownership verification, APK permissions analysis, and end-to-end Android game testing, using Anbox Connect, ADB, and Mobilerun to autonomously test game installation, onboarding, and in-app purchases on remote Android devices; reduced manual operational workload while maintaining a false-positive rate below 10%, in close collaboration with the infrastructure team and other internal teams

PERSONAL PROJECTS

SyncUp - Book Club Project

09/2022 - 07/2023

Contributions and Achievements

- Developed a business model for the app idea
- Built the back-end of the project using Spring Web MVC with Kotlin
- Designed and integrated a mobile client application for Android and iOS using Flutter
- Presented as the final project of my bachelor's degree and achieved a final grade of 18/20

Exploding Battleships - Battleships Game

09/2022 - 01/2023

Contributions and Achievements

- Crafted the back-end of the 2-player game using Spring Web MVC with Kotlin
- Integrated a mobile client application for Android using Kotlin
- Developed a desktop web client application using React.js and Typescript

EDUCATION

Master's Degree in Computer Science

NOVA School of Science and Technology

09/2023 - 11/2025

Achievements

- Accomplished a final GPA of 16 (0-20)
- Completed the degree entirely as a working student
- Delivered and defended my thesis titled "*Connectoide: A Case Study on the Effectiveness of AI Conversational Assistants in Aptoide Connect*" with Paulo Trezentos (Aptoide CEO) and João Magalhães (Professor) as my advisors and achieved a final grade of 18 (0-20)

Bachelor's Degree in Computer Science

Instituto Superior de Engenharia de Lisboa

09/2020 - 07/2023

Achievements

- Accomplished a final GPA of 17 (0-20)
- 1-week Game Jam contest winner
- Mentored 4 first-year students

- 📞 (+351) 960 231 301

SKILLS:

- Technical Skills
 - Software Development
 - Software Architecture
 - Full-Stack Development
 - Web API Development
 - UI Development
 - Mobile Development
 - Agile Development
 - Clean Code
- Programming Languages
 - Kotlin / Java
 - Python
 - Typescript / Javascript
- Frameworks & Libraries
 - Spring Framework
 - Node.js
 - Express.js
 - Angular.js
 - React.js
 - Flutter
 - LangChain
 - OpenAI / Anthropic / Gemini APIs
- Databases & Infrastructure
 - PostgreSQL
 - Redis
 - Milvus
 - Docker
 - Jenkins
 - AWS / GCP/ Azure
- Developer Tools
 - VS Code
 - Linux
 - Git
 - Postman
 - Jira / Confluence

PERSONAL TRAITS:

- Strategic
- Critical thinker
- Creative
- Organized
- Detail-oriented
- Collaborative
- Versatile
- Autonomous
- Hard worker
- Fast learner
- High achiever
